

Fly

BENEESERE

HEALTH/CONDITION SEEDS

INGREDIENTS*

Chicory, Bermuda grass, fennel, radish, cabbage, white lettuce, spinach, black lettuce, white millet, thistle seed, Japanese millet, Canadian canary seed, endive, blue poppy, wild seeds.

INSTRUCTIONS FOR PROPER USE

BENEESERE thanks to its large number of components of various origin (vegetable, grassland, cultivated and wild seeds), it provides essential nutritional elements that are not always present in the food of birds bred in captivity. The health/condition seeds are fed in special feeders 1-2 times per week in an isolated feeder/tab.

PACKAGING

4 kg bucket
12 kg bag

TARGET SPECIES

Canaries
Exotic birds
Small parakeets
Indigenous birds
